Kota, Rajasthan

St. Thomas School

*Class 10th (CBSE) - **92.8%***

2018 – 2019

Chitrakoot, Uttar Pradesh

EXPERIENCES

OASIS INFOBYTE | Frontend Developer

September 2024 – December 2024

- Gained practical experience in HTML, CSS, and JavaScript, facilitating the development of responsive and interactive websites.
- Seamless functionality of web applications across multiple browsers and devices by developing mobile-first applications that adjust to various screen dimensions.

PROJECTS

Blood Unity (Group) | Html,Css , Java Script and Php

April 2024 - May 2024

- To create a user-friendly and reliable digital platform that bridges the gap between blood donors and those in urgent need of blood, thereby enhancing accessibility, reducing response time in emergencies, and promoting voluntary blood donation.
- Blood Unity is a web-based platform designed to connect blood donors with recipients in real-time. The website serves as a centralized hub for people in need of blood, voluntary donors, hospitals, and blood banks. It simplifies the process of finding and requesting blood, encouraging community participation in saving lives.

Routine Diary(Solo) | Xml,Kotlin,Firebase

April 2025 (Ongoing)

- To develop a digital diary application that helps users efficiently plan, organize, and track their daily routines and tasks, promoting better time management, productivity, and personal growth..
- The app is built using React Native for a smooth, cross-platform mobile experience. It uses Firebase for backend services like authentication, real-time database, and push notifications.

Food Ordering App(Solo) | Xml,Kotlin,Firebase,MySQL

June 2024- August 2024

- To develop a convenient, efficient, and user-friendly mobile application that enhances the food ordering experience by connecting customers with nearby restaurants, ensuring timely delivery, accurate orders, and improved customer satisfaction.
- The app uses Flutter or React Native for the frontend and Node.js, Django, or Laravel for the backend. It integrates with MongoDB or MySQL, supports real-time tracking, secure payments, and push notifications using tools like Firebase and Stripe.

ACHIEVEMENT

- Completed the Training Program and Gen AI workshop conducted by KIET Group of Institutions.
- **InnoTech** : Ranked among the top **10** at largest hackthon organised by KIET Group of Institutions
- Recently conducted a three-day workshop centered around Figma.

CERTIFICATIONS

- Cloud Foundation Course - Explored foundational concepts in cloud computing and AWS services
- Certified in Learning SQL Programming: through linkedin learning
- Software developer certified course by Udemy
